

13th December 2019

Dear Families,

Re: Deep cleaning procedure at Burton Borough School to avoid spread of viruses and germs

Further to my letter dated 10th December 2019, I would like to inform you of the cleaning procedures that we have been carrying out and will be carrying out over the next few days.

Our cleaning team have been deep cleaning all surfaces and touch points with Milton every day over the last couple of weeks. We will be using bleach as part of the deep cleaning process this afternoon from 3:30pm. As bleach will be used, all staff and students have been asked to leave the site by this time for health and safety reasons.

In addition to using bleach this afternoon, we have asked Vortex, a professional cleaning company who specialises in cleaning hospitals and schools to come in on Sunday to carry out further deep cleaning using ULV Fog. ULV Fog settles on every visible surface and prevents the spread of any germs or viruses.

We are in contact with Public Health England and the Local Authority so that we are up to date with the procedures we need to carry out and to ensure that we can control/prevent the outbreaks.

Yours sincerely,

Krissi Carter
Principal
